Question	Marks	Sub-question	Marks (per sub-question)	Taxonomy Level
Unit 1	14	1.1 Explain the structure and working of Biological Neural Network.	7	Understand
		1.2 Describe the Topology of neural network architecture.	4	Apply
		1.3 Discuss the Features, Characteristics, and Types of Neural Networks.	3	Analyze

| **Optional Question 1** | 14 | 1.4 Compare and contrast BNN and ANN. | 7 | Analyze | | | | 1.5 Explain the Basic learning laws in Neural Networks. | 4 | Understand | | | | 1.6 Give few real-world Applications of neural networks. | 3 | Create |

| **Unit 1** | 14 | 2.1 Describe the history of Neural Networks. | 5 | Understand | | | | 2.2 Explain the Neural net architecture. | 6 | Understand | | | | 2.3 Discuss the Activation functions and Models of neuron-Mc Culloch & Pitts model, Perceptron, and Adaline model. | 3 | Apply |

| **Optional Question 2** | 14 | 2.4 Explain the working of a Perceptron. | 6 | Analyze | | | | 2.5 Describe the limitations of Adaline. | 4 | Evaluate | | | | 2.6 Discuss the potential ethical implications of using Neural Networks. | 4 | Create |
